

TomTom Instructions

These directions require MyTomTom which is used by the following devices:

- GO 800/1000/2000 Series
- Start 20/25 Series
- Via Series
- Sony XNV Navigation Module
- TomTom NaviBox
- Blue&Me TomTom 2

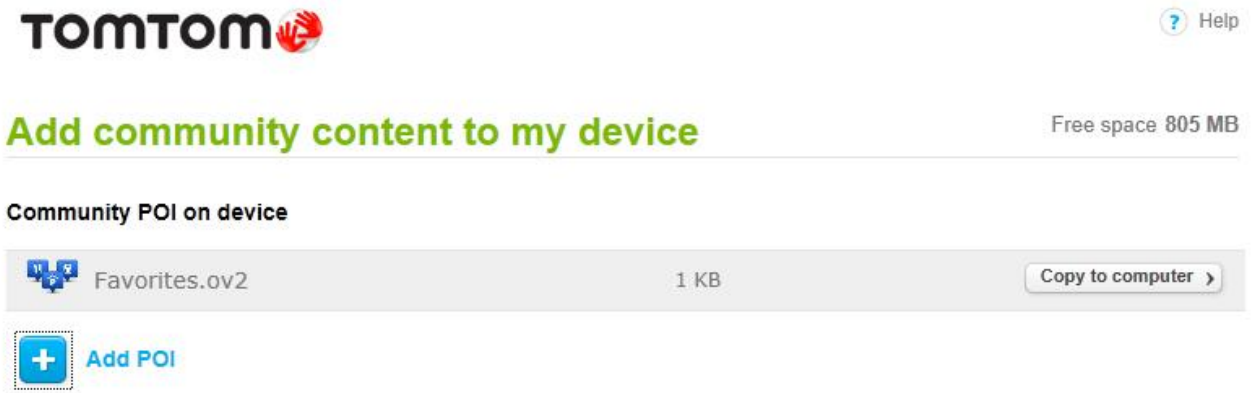

For all other TomTom devices, please see the TomTom web site (<http://www.tomtom.com>) for instructions on how to upload custom POI files.

To install the custom POI file that contains the ATMs on THE EXCHANGE® Network, perform the following steps:

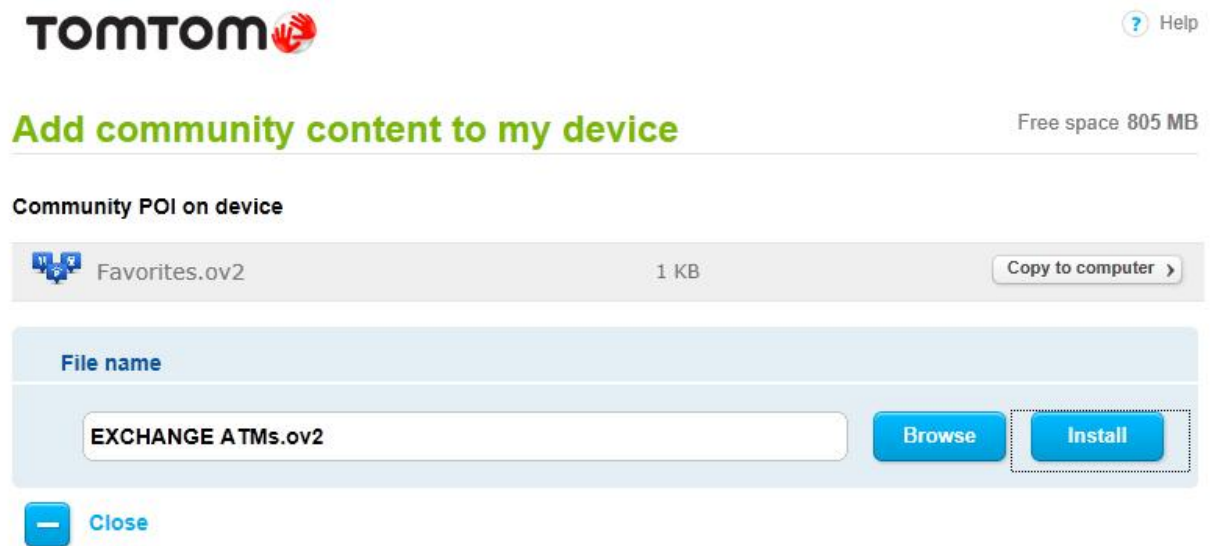

1. Download the custom POI file that contains the ATMs on THE EXCHANGE® Network. Make a note of the location of the downloaded file, named “EXCHANGE ATMs.ov2” by default.
2. Connect your TomTom device to your computer.
3. If MyTomTom does not launch automatically, start the application manually.
4. On the MyTomTom menu, choose “Add Community Content”.

5. On the “Add community content to my device” page, click the “Add POI” button.

6. Click the “Browse” button and locate the file you downloaded in step 1.

7. Click the “Install” button. Your device will indicate that your device is being updated. Wait until the “Finished updating your device” message appears before disconnecting your device.
